

## Specification Sheet

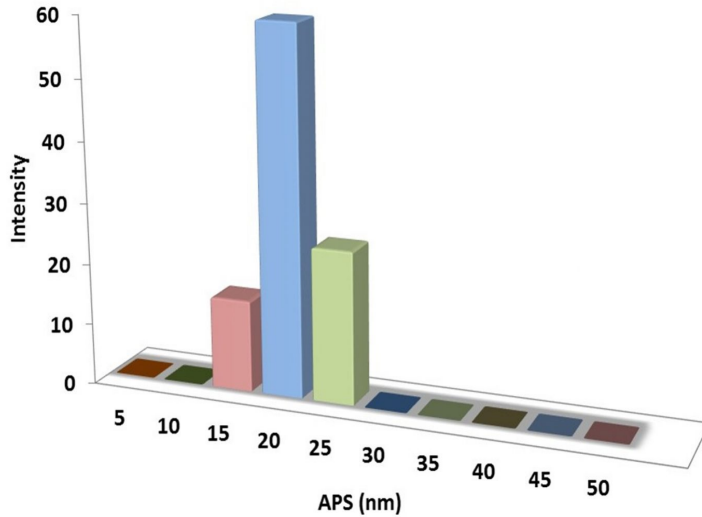

Ceramic/Car, Nano SiO<sub>2</sub> Resin, SiO<sub>2</sub>: 85%, Super Hydrophobic Coating

Stock No: NS6130-12-000773, CAS: N/A

|                              |   |                             |
|------------------------------|---|-----------------------------|
| <b>Product</b>               | : | <b>Nano Coating Ceramic</b> |
| Stock No                     | : | NS6130-12-000773            |
| Purity                       | : | 99.9 %                      |
| Particle Size                | : | 20nm                        |
| Molecular Formula            | : | Nano SiO <sub>2</sub> Resin |
| Form                         | : | liquid                      |
| Color                        | : | Transparent liquid          |
| pH                           | : | 6-7                         |
| Hardness                     | : | 9H                          |
| Coverage Area                | : | 50-80 sqm/L                 |
| Water Contact Angle          | : | 110-120°                    |
| SiO <sub>2</sub> Content     | : | 85%                         |
| Shelf Life                   | : | ~3 years                    |
| Application                  | : | Car paint, Ceramic          |
| <b>Main Inspect Verifier</b> | : | <b>Manager QC</b>           |

**Note:** Product Specification are subject to amendment and may change over time
