

# STRONTIUM

NANOPOWDER

Strontium is used for Bone pain related to bone cancer. Research shows that a special prescription form of strontium (strontium-89 chloride) given intravenously (by IV) reduces pain from metastatic bone cancer. Also used for sensitive teeth. Strontium with strontium acetate in toothpaste relieves pain in sensitive teeth. Brushing twice daily seems to work best. Several different forms of strontium are used as medicine. Scientists are testing strontium ran elate to see if it can be taken by mouth to treat thinning bones (osteoporosis).

# APPLICATIONS

- ✓ Electroluminescent
- ✓ Colorant
- ✓ Ceramics
- ✓ Compound materials
- ✓ Electronics
- ✓ Magnets

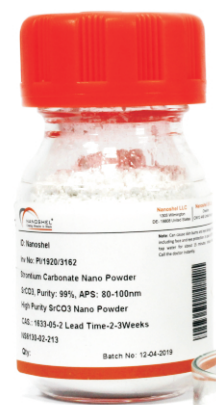

## SPECS

- ✓ Purity: 99.9%
- ✓ Molecular Formula: SrCO<sub>3</sub>
- ✓ Molecular Weight: 147.63 g/mol
- ✓ Density: 3.7 g/cm<sup>3</sup>
- ✓ Bulk Density: 0.95 g/cm<sup>3</sup>

Melting Point: 1290 °C

**All types of particles size are available in micro and nano range.**
