

# CALCIUM SULFATE Nanopowder

Calcium sulfate (or calcium sulphate) is the inorganic compound with the formula  $\text{CaSO}_4$  and related hydrates. In the form of  $\gamma$ -anhydrite (the anhydrous form), it is used as a desiccant. One particular hydrate is better known as plaster of Paris, and another occurs naturally as the mineral gypsum. It has many uses in industry. Calcium sulfate is used in the food industry as an anticaking agent, dough strengthener and stabilizer.

## Quick Facts

|          |                              |
|----------|------------------------------|
| Product  | : Calcium Sulfate Nanopowder |
| Stock No | : NS6130-12-000658           |
| CAS      | : 7778-18-9                  |
| Form     | : Powder                     |

## TECHNICAL Specification

|                  |                         |
|------------------|-------------------------|
| APS              | : 80-100nm              |
| Purity           | : 99.9%                 |
| Molecular Weight | : 136.14g/mol           |
| Density          | : 2.96g/cm <sup>3</sup> |
| Melting Point    | : 1460°C                |

### Packing Sizes:

25Gms, 50Gms, 100Gms, 500Gms & Bulk Orders
