## MOLYBDATE Powder

Lithium molybdate ( $\text{Li}_2\text{MoO}_4$ ) is a chemical compound. It is mainly used as an inhibitor in some types of industrial air conditioning. Lithium molybdate is a class of electrode material that can be used in the fabrication of lithium-ion batteries. Lithium-ion batteries consist of anode, cathode, and electrolyte with a charge-discharge cycle. These materials enable the formation of greener and sustainable batteries for electrical energy storage.
