

# SODIUM BROMIDE Powder

Sodium bromide is an inorganic compound with the formula NaBr. It is a high-melting white, crystalline solid that resembles sodium chloride. It is a widely used source of the bromide ion and has many applications. Sodium bromide is used to prepare dense fluids used in oil wells. Sodium bromide is used in the photographic industry, has some application as a cocatalyst, as a wood preservative, and as a pharmaceutical.

## Quick Facts

|          |                         |
|----------|-------------------------|
| Product  | : Sodium Bromide Powder |
| Stock No | : NS6130-12-000759      |
| CAS      | : 7647-15-6             |
| Form     | : Powder                |

## TECHNICAL Specification

|                  |                         |
|------------------|-------------------------|
| Formula          | : NaBr                  |
| Purity           | : >99.99%               |
| Molecular Weight | : 102.89g/mol           |
| Density          | : 3.21g/cm <sup>3</sup> |
| Melting Point    | : 747°C                 |

### Packing Sizes:

25Gms, 50Gms, 100Gms, 500Gms & Bulk Orders
