

ZINC

Bromide POWDER

Zinc bromide ($ZnBr_2$) is an inorganic compound with the chemical formula $ZnBr_2$. It is a colourless salt that shares many properties with zinc chloride ($ZnCl_2$), namely a high solubility in water forming acidic solutions, and solubility in organic solvents. It is hygroscopic and forms a dihydrate $ZnBr_2 \cdot 2H_2O$. Zinc bromide solution can be used as a transparent shield against radiation. It is used as an optimal catalyst for stereospecific and regioselective reaction of silacyclopropanes with carbonyl compounds.

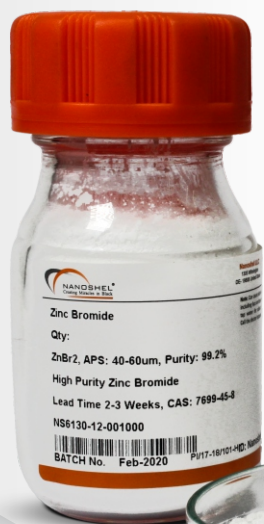

Quick Facts

Product	: Zinc Bromide Powder
Stock No	: NS6130-12-001000
CAS	: 7699-45-8
Color	: White/colorless
Form	: Powder

TECHNICAL Specification

APS	: < 100nm
Purity	: 99.999%
Molecular Weight	: 255.19g/mol
Density	: 4.20g/cm ³
Melting Point	: 394°C

APS
40-60µm

PURITY
99.999%

Packing Sizes:

25Gms, 50Gms, 100Gms, 500Gms & Bulk Orders
